

# Food Safety Education

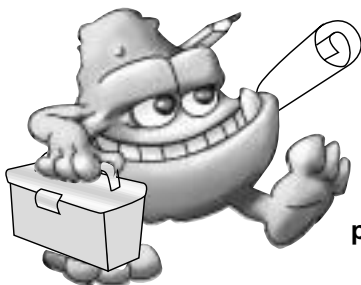

## Stories ★ Solutions ★ Strategies

### The Floorplan:

We've broken ground for the all-new **Food Safety Education Stories, Solutions, and Strategies Database** . . . and *your* results and experiences are our building supplies!

This unique Database will contain ideas and information of successful education, training, partnering, research, and BAC!-Fighting activities from **out in the field**. You'll now have **immediate** access to what others are doing to promote food safety — and *you* can **share your efforts** with *them*, too.

Construction is underway! But now we need **YOU** — **our local partners** — to give us a hand.

### The Nuts and Bolts:

**What:** A searchable source of food safety education stories, solutions, and strategies

**When:** Ready for **YOUR** input this summer . . . then, live and "searchable" on October 15, 2001

**Why:** To share your success stories to make everyone's programming efforts even better . . . and to let us see how you're using your food safety materials!

**Where:** Log on to add your information to this brand-new, landmark Database:

[www.nal.usda.gov/fnic/foodborne](http://www.nal.usda.gov/fnic/foodborne)

OR

[www.fightbac.org](http://www.fightbac.org)

### YOUR Task:

It's easy . . . it's fun . . . and it's *really* important!

Log on and fill out the easy-access form . . . because it's *your* practical "bricks-and-mortar" that will build the new Database from the ground up.

And remember — as you show us how you're using food safety education tools . . . like

- Fight BAC!™
- Thermy™
- National Food Safety Education Month<sup>SM</sup> materials
- Other programs

. . . we'll be able to keep a steady supply of ideas and materials coming your way!

### The Finished Product:

With your input as our virtual bricks, the Database will be open for business on October 15. So take a moment, and roll up your sleeves. We'll ALL be glad you did!
